

Jaguar System with Conventional Track

The Jaguar System with Conventional Track is a linear profile which can be supplied in continuous lengths. The addition of the Conventional Track within the profile allows for full flexibility on luminaire placement whilst allowing for future customisation. The profile is modular and designed to house Jaguar System Track accessories to suit a wide range of interior spaces. Multiple runs come as standard with a 'through wiring' loom using 'plug and play' connectors. The System can be supplied in either surface or suspended formats and finished in any RAL colour.

Please contact our Sales team for design requirements and further information.
